## **Geomorphology** Mateo Gutierrez

This book provides a detailed coverage of the landforms of Planet Earth and the processes that shaped them. The study of these morphologies, some of which formed during past geological periods under environmental conditions very different from those of today, makes it possible to reconstruct the evolution of relief and to infer environmental changes that have involved geological media, the climate, or human activity.

A major advance of Geomorphology in recent decades is the development of techniques that make it possible to quantify morphogenetic processes and rates at which forms change under different environmental conditions. The development of Geochronology, or absolute dating methods, is helping us correct the limitations of relative dating that have prevailed in Geomorphology for many years. The ability to assign numerical ages to both landforms and deposits opens up multiple possibilities for reconstructing the evolution of relief, making correlations, calculating rates, and estimating recurrence periods.

A theme of major concern facing people today is the possible warming of the planet due to the release of greenhouse gases into the environment. Investigations conducted by the scientific community show that this temperature increase is at least partially anthropogenic. Given this more-than-probable cause and effect relationship, the most sensible and prudent path is to design and apply mitigation measures to alleviate this heating that can negatively affect both the natural environment and human society. The information that Geomorphology can provide on the recent past (Historical Geomorphology) may be very useful in making predictions on the activity of these potentially dangerous processes in the future and on the possible effects of environmental changes.

The aim of this book is to provide a general vision of the multiple aspects of Geomorphology and to provide a methodological foundation to approach the study of various branches of geomorphology. To this end, the book contains a basic bibliography that can be used for future research. In addition, applied aspects of Geomorphology are covered at the end of each chapter to provide knowledge of the activities of geomorphologists in the professional world.

### From reader reviews:

#### **Julia Hanson:**

Spent a free time for you to be fun activity to perform! A lot of people spent their sparetime with their family, or their own friends. Usually they doing activity like watching television, going to beach, or picnic inside park. They actually doing same task every week. Do you feel it? Will you something different to fill your free time/ holiday? Could be reading a book could be option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to consider look for book, may be the book untitled Geomorphology can be great book to read. May be it can be best activity to you.

#### **Beatrice Raybon:**

Reading a book to be new life style in this 12 months; every people loves to learn a book. When you learn a book you can get a wide range of benefit. When you read publications, you can improve your knowledge, simply because book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. If you would like get information about your review, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, and soon. The Geomorphology provide you with new experience in looking at a book.

#### **Connie Medina:**

Beside this Geomorphology in your phone, it may give you a way to get more close to the new knowledge or data. The information and the knowledge you are going to got here is fresh from oven so don't possibly be worry if you feel like an aged people live in narrow town. It is good thing to have Geomorphology because this book offers to your account readable information. Do you sometimes have book but you would not get what it's all about. Oh come on, that will not happen if you have this in your hand. The Enjoyable option here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss that? Find this book and also read it from now!

#### **Shirley Williams:**

Is it you who having spare time then spend it whole day through watching television programs or just resting on the bed? Do you need something new? This Geomorphology can be the solution, oh how comes? A book you know. You are therefore out of date, spending your free time by reading in this brand-new era is common not a geek activity. So what these publications have than the others?
