Gregory Videtic MD CM FRCPC, Andrew MD Vassil

**Handbook of Treatment Planning in Radiation Oncology** Gregory Videtic MD CM FRCPC, Andrew MD Vassil

The *Handbook of Treatment Planning in Radiation Oncology* is a focused pocket-sized handbook designed for Radiation Oncology trainees and residents, to serve as an up-to-date, quick resource to lead them through all of the standard steps to plan and deliver radiotherapy for all major malignancies. The goal of the *Handbook* is to provide evidence-based information but also to be reflective of the knowledge gained through experience in practice.

All chapters represent a joint collaboration between residents and staff radiation oncologists, in the Department of Radiation Oncology at the Cleveland Clinic. Throughout the *Handbook*, the focus is on a series of steps to follow in order to successfully complete effective radiotherapy planning. Sections are organized by body site or system, whichever proved best for consistency in presenting the general principles of planning. Also included are specialized topics such as palliative therapy and pediatrics. After a discussion of general planning requirements, each specific subsite within a given section then provides more specific details on approaches to radiotherapy planning.

Illustrated throughout with over 200 images, the *Handbook* will be a valuable tool for every Radiation Oncology practitioner or trainee.

## Features of the *Handbook of Treatment Planning in Radiation Oncology* include

- A focus on a consistent, step by step approach to radiotherapy planning
- Content is present in a bulleted format for ease of review
- The text is extensively supported by color images
- The *Handbook* is pocket-sized for portability
