Drug-Device Combination Products: Delivery Technologies and Applications (Woodhead Publishing Series in Biomaterials)

Drug delivery systems represent a vast area of research and development within biomaterials and medicine and the demand for sophisticated drug delivery devices continues to drive novel product development. Advanced drug delivery devices can offer significant advantages over conventional drugs and devices alone, such as increased efficiency, improved performance and convenience. The purpose of this book is to illustrate how effective drug delivery can be achieved by means other than tablets. The book will provide a thorough analysis of the fundamentals, applications and new technologies of drug-device combination products for use throughout the human body.

Part one provides readers with an introduction and background to the field. Chapters in Part two discuss areas of application such as catheter based products, drug eluting stents and beads and anti-biotic loaded cements. Part three covers the development of drug device combination products with chapters on such topics as pre-clinical testing, sterilisation, patent issues and regulation of drug device combination products.

With its distinguished editor and team of international contributors, Drug-device combination products: delivery technologies and applications is an invaluable reference for product development specialists, materials scientists and engineers in the biomedical industry and academia as well as those concerned with drug delivery.

- Illustrates how effective drug delivery can be achieved by means other than tablets providing readers with a comprehensive introduction and background to the field
- Provides a thorough analysis of the fundamentals, applications and new technologies of drug device combination products
- Discusses areas of application such as catheter based products and reviews the development of drug device combination products including pre-clinical testing and sterilisation

From reader reviews:

Ryan Donahue:

What do you think about book? It is just for students as they are still students or this for all people in the world, what the best subject for that? Only you can be answered for that question above. Every person has several personality and hobby for every single other. Don't to be compelled someone or something that they don't wish do that. You must know how great and important the book Drug-Device Combination Products: Delivery Technologies and Applications (Woodhead Publishing Series in Biomaterials). All type of book is it possible to see on many solutions. You can look for the internet solutions or other social media.

James Daniels:

What do you about book? It is not important along? Or just adding material if you want something to explain what you problem? How about your extra time? Or are you busy man? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Everybody has many questions above. They have to answer that question due to the fact just their can do in which. It said that about publication. Book is familiar on every person. Yes, it is suitable. Because start from on pre-school until university need this specific Drug-Device Combination Products: Delivery Technologies and Applications (Woodhead Publishing Series in Biomaterials) to read.

Daniel Caudle:

As we know that book is essential thing to add our expertise for everything. By a guide we can know everything we wish. A book is a pair of written, printed, illustrated or blank sheet. Every year had been exactly added. This reserve Drug-Device Combination Products: Delivery Technologies and Applications (Woodhead Publishing Series in Biomaterials) was filled regarding science. Spend your spare time to add your knowledge about your research competence. Some people has diverse feel when they reading a book. If you know how big good thing about a book, you can sense enjoy to read a reserve. In the modern era like currently, many ways to get book you wanted.

Ann Yoho:

As a scholar exactly feel bored to help reading. If their teacher asked them to go to the library or even make summary for some publication, they are complained. Just small students that has reading's heart and soul or real their pastime. They just do what the instructor want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that studying is not important, boring as well as can't see colorful pics on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Drug-Device Combination Products: Delivery Technologies and Applications (Woodhead Publishing Series in Biomaterials) can make you feel more interested to read.
