Amino-Acid Homopolymers Occurring in Nature: 15 (Microbiology Monographs)

Amino-Acid Homopolymers Occurring in Nature: 15 (Microbiology Monographs)

Microorganisms are capable of producing a wide variety of biopolymers. Homopolymer peptides, which are made up of only a single type of amino acid, are far less ubiquitous. The only two amino-acid homopolymers known to occur in nature are presented in this volume.

Poly-epsilon-L-lysine is a polycationic peptide and exhibits antimicrobial activity against a wide spectrum of microorganisms. It is both safe and biodegradable and is therefore used as a food preservative in several countries. In addition, there has been great interest in medical and other applications of poly-lysine and its derivatives.

In contrast, poly-gamma-glutamic acid is an unusual anionic polypeptide. It is also water soluble, biodegradable, edible, non-toxic and non-immunogenic and can be chemically modified to introduce various drugs. These features are very useful for pharmaceutical and biomedical applications. Poly-glutamic acid is also a highly attractive as a food ingredient.

From reader reviews:

Jose Coleman:

Do you have favorite book? When you have, what is your favorite's book? Book is very important thing for us to be aware of everything in the world. Each guide has different aim or perhaps goal; it means that reserve has different type. Some people feel enjoy to spend their time for you to read a book. They can be reading whatever they get because their hobby is definitely reading a book. Why not the person who don't like studying a book? Sometime, individual feel need book if they found difficult problem or even exercise. Well, probably you should have this Amino-Acid Homopolymers Occurring in Nature: 15 (Microbiology Monographs).

Joseph Mattos:

The actual book Amino-Acid Homopolymers Occurring in Nature: 15 (Microbiology Monographs) has a lot of knowledge on it. So when you check out this book you can get a lot of benefit. The book was compiled by the very famous author. Mcdougal makes some research ahead of write this book. That book very easy to read you can get the point easily after looking over this book.

Melissa Fernandez:

Reading a book to get new life style in this season; every people loves to examine a book. When you study a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what types of book that you have read. If you need to get information about your review, you can read education books, but if you want to entertain yourself read a fiction books, this sort of us novel, comics, along with soon. The Amino-Acid Homopolymers Occurring in Nature: 15 (Microbiology Monographs) will give you a new experience in reading a book.

Norbert Walling:

Book is one of source of expertise. We can add our information from it. Not only for students but also native or citizen have to have book to know the upgrade information of year to year. As we know those textbooks have many advantages. Beside all of us add our knowledge, can also bring us to around the world. By the book Amino-Acid Homopolymers Occurring in Nature: 15 (Microbiology Monographs) we can take more advantage. Don't you to be creative people? To become creative person must prefer to read a book. Just choose the best book that appropriate with your aim. Don't be doubt to change your life with this book Amino-Acid Homopolymers Occurring in Nature: 15 (Microbiology Monographs). You can more attractive than now.
