Fuzzy Image Processing and Applications with MATLAB

Tamalika Chaira, Ajoy Kumar Ray

Fuzzy Image Processing and Applications with MATLAB Tamalika Chaira, Ajoy Kumar Ray

In contrast to classical image analysis methods that employ "crisp" mathematics, fuzzy set techniques provide an elegant foundation and a set of rich methodologies for diverse image-processing tasks. However, a solid understanding of fuzzy processing requires a firm grasp of essential principles and background knowledge.

Fuzzy Image Processing and Applications with MATLAB® presents the integral science and essential mathematics behind this exciting and dynamic branch of image processing, which is becoming increasingly important to applications in areas such as remote sensing, medical imaging, and video surveillance, to name a few.

Many texts cover the use of crisp sets, but this book stands apart by exploring the explosion of interest and significant growth in fuzzy set image processing. The distinguished authors clearly lay out theoretical concepts and applications of fuzzy set theory and their impact on areas such as enhancement, segmentation, filtering, edge detection, content-based image retrieval, pattern recognition, and clustering. They describe all components of fuzzy, detailing preprocessing, threshold detection, and match-based segmentation.

Minimize Processing Errors Using Dynamic Fuzzy Set Theory

This book serves as a primer on MATLAB and demonstrates how to implement it in fuzzy image processing methods. It illustrates how the code can be used to improve calculations that help prevent or deal with imprecision—whether it is in the grey level of the image, geometry of an object, definition of an object's edges or boundaries, or in knowledge representation, object recognition, or image interpretation.

The text addresses these considerations by applying fuzzy set theory to image thresholding, segmentation, edge detection, enhancement, clustering, color retrieval, clustering in pattern recognition, and other image processing operations. Highlighting key ideas, the authors present the experimental results of their own new fuzzy approaches and those suggested by different authors, offering data and insights that will be useful to teachers, scientists, and engineers, among others.

From reader reviews:

Esta Banks:

Reading a book to get new life style in this yr; every people loves to learn a book. When you go through a book you can get a large amount of benefit. When you read textbooks, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your study, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, in addition to soon. The Fuzzy Image Processing and Applications with MATLAB provide you with a new experience in reading through a book.

Michael Banks:

Beside that Fuzzy Image Processing and Applications with MATLAB in your phone, it may give you a way to get more close to the new knowledge or information. The information and the knowledge you are going to got here is fresh from your oven so don't end up being worry if you feel like an outdated people live in narrow small town. It is good thing to have Fuzzy Image Processing and Applications with MATLAB because this book offers to your account readable information. Do you often have book but you seldom get what it's all about. Oh come on, that would not happen if you have this in the hand. The Enjoyable agreement here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss the item? Find this book and also read it from now!

Deborah Mazarella:

In this particular era which is the greater particular person or who has ability in doing something more are more important than other. Do you want to become one of it? It is just simple way to have that. What you are related is just spending your time very little but quite enough to experience a look at some books. One of several books in the top record in your reading list is usually Fuzzy Image Processing and Applications with MATLAB. This book that is qualified as The Hungry Mountains can get you closer in growing to be precious person. By looking way up and review this e-book you can get many advantages.

Dedra Clark:

A lot of people said that they feel fed up when they reading a reserve. They are directly felt that when they get a half elements of the book. You can choose the particular book Fuzzy Image Processing and Applications with MATLAB to make your own reading is interesting. Your current skill of reading skill is developing when you like reading. Try to choose basic book to make you enjoy to read it and mingle the feeling about book and examining especially. It is to be 1st opinion for you to like to available a book and read it. Beside that the e-book Fuzzy Image Processing and Applications with MATLAB can to be your new friend when you're really feel alone and confuse in what must you're doing of that time.
