River Futures: An Integrative Scientific Approach to River Repair (The Science and Practice of Ecological Restoration Series)

River Futures: An Integrative Scientific Approach to River Repair (The Science and Practice of Ecological Restoration Series)

Across much of the industrialized world, rivers that were physically transformed and ecologically ruined to facilitate industrial and agricultural development are now the focus of restoration and rehabilitation efforts. *River Futures* discusses the emergence of this new era of river repair and documents a comprehensive biophysical framework for river science and management.

The book considers what can be done to maximize prospects for improving river health while maintaining or enhancing the provision of ecosystem services over the next fifty to one-hundred years. It provides a holistic overview of considerations that underpin the use of science in river management, emphasizing cross-disciplinary understanding that builds on a landscape template.

The book

- frames the development of integrative river science and its application to river rehabilitation programs
- develops a coherent set of guiding principles with which to approach integrative river science
- considers the application of cross-disciplinary thinking in river rehabilitation experiences from around the world
- examines the crossover between science and management, outlining issues that must be addressed to promote healthier river futures

Case studies explore practical applications in different parts of the world, highlighting approaches to the use of integrative river science, measures of success, and steps that could be taken to improve performance in future efforts.

River Futures offers a positive, practical, and constructive focus that directly addresses the major challenge of a new era of river conservation and rehabilitation—that of bringing together the diverse and typically discipline-bound sets of knowledge and practices that are involved in repairing rivers. It is a valuable resource for anyone involved in river restoration and management, including restorationists, scientists, managers, and policymakers, as well as undergraduate and graduate students.

From reader reviews:

Jeanne Gonzales:

In this 21st century, people become competitive in every way. By being competitive at this point, people have to do something to make them survive, being in the middle of often the crowded place and notice by means of surrounding. One thing that oftentimes many people have underestimated this for a while is reading. Yeah, by reading a guide your ability to survive enhance then having chance to remain than other is high. For yourself who want to start reading a book, we give you that River Futures: An Integrative Scientific Approach to River Repair (The Science and Practice of Ecological Restoration Series) book as basic and daily reading book. Why, because this book is more than just a book.

Kimberly Wheatley:

Here thing why this kind of River Futures: An Integrative Scientific Approach to River Repair (The Science and Practice of Ecological Restoration Series) are different and reputable to be yours. First of all reading through a book is good nonetheless it depends in the content than it which is the content is as yummy as food or not. River Futures: An Integrative Scientific Approach to River Repair (The Science and Practice of Ecological Restoration Series) giving you information deeper as different ways, you can find any reserve out there but there is no e-book that similar with River Futures: An Integrative Scientific Approach to River Repair (The Science and Practice of Ecological Restoration Series). It gives you thrill studying journey, its open up your personal eyes about the thing in which happened in the world which is possibly can be happened around you. You can actually bring everywhere like in playground, café, or even in your means home by train. When you are having difficulties in bringing the printed book maybe the form of River Futures: An Integrative Scientific Approach to River Repair (The Science and Practice of Ecological Restoration Series) in e-book can be your alternate.

Martha Bryant:

Reading a book for being new life style in this year; every people loves to study a book. When you learn a book you can get a wide range of benefit. When you read guides, you can improve your knowledge, because book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your study, you can read education books, but if you want to entertain yourself look for a fiction books, these kinds of us novel, comics, in addition to soon. The River Futures: An Integrative Scientific Approach to River Repair (The Science and Practice of Ecological Restoration Series) provide you with a new experience in reading a book.

Arthur Warnick:

Don't be worry should you be afraid that this book will filled the space in your house, you will get it in e-book way, more simple and reachable. This specific River Futures: An Integrative Scientific Approach to River Repair (The Science and Practice of Ecological Restoration Series) can give you a lot of close friends

because by you considering this one book you have thing that they don't and make you more like an interesting person. This particular book can be one of one step for you to get success. This reserve offer you information that possibly your friend doesn't realize, by knowing more than various other make you to be great folks. So , why hesitate? Let me have River Futures: An Integrative Scientific Approach to River Repair (The Science and Practice of Ecological Restoration Series).
