Special Functions for Scientists and Engineers (Dover Books on Mathematics) W. W. Bell

Clear and comprehensive, this text provides undergraduates with a straightforward guide to special functions. It is equally suitable as a reference volume for professionals, and readers need no higher level of mathematical knowledge beyond elementary calculus. Topics include the solution of second-order differential equations in terms of power series; gamma and beta functions; Legendre polynomials and functions; Bessel functions; Hermite, Laguerre, and Chebyshev polynomials; Gegenbauer and Jacobi polynomials; and hypergeometric and other special functions. Three appendices offer convenient tabulation of principal results, and a generous supply of worked examples and problems includes some hints and solutions. 1968 edition. 25 figures.

From reader reviews:

William Smith:

This Special Functions for Scientists and Engineers (Dover Books on Mathematics) are generally reliable for you who want to certainly be a successful person, why. The reason of this Special Functions for Scientists and Engineers (Dover Books on Mathematics) can be one of many great books you must have is usually giving you more than just simple reading food but feed anyone with information that probably will shock your earlier knowledge. This book is actually handy, you can bring it all over the place and whenever your conditions in e-book and printed ones. Beside that this Special Functions for Scientists and Engineers (Dover Books on Mathematics) forcing you to have an enormous of experience for example rich vocabulary, giving you test of critical thinking that could it useful in your day exercise. So , let's have it and revel in reading.

Allison Price:

People live in this new time of lifestyle always try to and must have the free time or they will get lots of stress from both daily life and work. So , when we ask do people have spare time, we will say absolutely of course. People is human not really a huge robot. Then we consult again, what kind of activity are there when the spare time coming to you actually of course your answer will probably unlimited right. Then ever try this one, reading publications. It can be your alternative throughout spending your spare time, typically the book you have read is actually Special Functions for Scientists and Engineers (Dover Books on Mathematics).

Ellen Omalley:

As a college student exactly feel bored to help reading. If their teacher questioned them to go to the library or even make summary for some publication, they are complained. Just small students that has reading's spirit or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that reading is not important, boring as well as can't see colorful photos on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Special Functions for Scientists and Engineers (Dover Books on Mathematics) can make you sense more interested to read.

Micheal Ruiz:

Publication is one of source of knowledge. We can add our know-how from it. Not only for students but in addition native or citizen need book to know the up-date information of year to be able to year. As we know those textbooks have many advantages. Beside we add our knowledge, also can bring us to around the world. From the book Special Functions for Scientists and Engineers (Dover Books on Mathematics) we can have more advantage. Don't you to be creative people? For being creative person must prefer to read a book. Simply choose the best book that suitable with your aim. Don't end up being doubt to change your life at this book Special Functions for Scientists and Engineers (Dover Books on Mathematics). You can more

attractive than now.
